Profile

- **Full Stack Software Engineer**
 - Aspiring Full Stack Software Engineer with extensive training in designing, developing, and deploying high-performance web applications. Skilled in applying modern web technologies to build user-friendly and efficient systems.
 - **Front-End Expertise:** Proficient in HTML, CSS, JavaScript, React.js, and Bootstrap, successfully completing **10+ responsive UI designs** during academic and personal projects.
 - **UI/UX Design:** Applied advanced UI/UX principles to create **5+ custom web interfaces**, ensuring seamless navigation and accessibility for diverse user bases.
 - **Back-End Proficiency:** Skilled in Node.js, and microservices architecture, with hands-on experience developing **5+ scalable systems** through coursework and training.
- **Practical Projects:** Delivered **10+ personal and academic projects**, including full-stack web applications, task management systems, and e-commerce prototypes.
- **Continuous Learning:** Completed **100+ hours** of training in modern development tools and frameworks, including hands-on experience with Git and Agile methodologies.
- I am eager to apply my skills in a professional environment, contribute to impactful projects, and grow as a Full Stack Software Engineer.

Education

2022 – 2026
Assuit, Egypt

Computer Science - Software Engineering
Assiut National University - Bachelor degree

- Third level - GPA 3.7

Experience

2023/07 – 2023/09
Asyut, Egypt

Summer Internship in Web Development and Technologies
Information Technology Institute 

- Engineered responsive websites using HTML, CSS, and JavaScript to ensure seamless cross-browser compatibility
- Enhanced user experiences that contributed to a 30% increase in site engagement within three months of launch.

Key Skills: HTML, CSS, JavaScript, React.js, Bootstrap, PHP, Node.js, MySQL, MongoDB, Git, API Integration

2023/01 – 2023/06
6th of October, Egypt

Internship in Artificial Intelligence and Applications Training
Zewail City of Science, Technology and Innovation 

- Built and deployed machine learning models using Python, TensorFlow, and scikit-learn for image classification, outcome prediction, and anomaly detection.
- Enhanced accuracy through data pre-processing and hyperparameter tuning.

Key Skills: Machine Learning, Deep Learning, Cloud Platforms (AWS/Google Cloud)

Projects

Owl Gallery – Full-Stack E-Commerce Web Application

ASP.NET Core MVC | SQL Server | Entity Framework | Bootstrap | Identity

- Built a full-stack e-commerce platform for jewelry sales with user-friendly navigation and mobile responsiveness.
- Integrated user registration/login, Google authentication, and role-based access for admins.
- Implemented product management (CRUD), image uploads, smart sales system, and dynamic badges like
- Developed a secure checkout process with order receipts and password reset via email.

- Designed admin dashboard with product, user, order, and sales control, including pagination and alerts.

Resort Booking System

Flask, SQLAlchemy, MySQL, HTML/CSS/JS

- Built a full-featured hotel booking platform with dynamic room selection, guest options, and price calculation
- Designed a normalized MySQL database and implemented CRUD operations across rooms, services, users, and bookings
- Developed a secure admin dashboard for managing content, with role-based access control
- Integrated responsive UI with image upload, real-time feedback, and user-friendly booking flow

Shell Implementation

- Developed a Command-Line Shell Application: Designed and implemented a shell application with a virtual file system using C++17, supporting 10+ interactive commands for directory management, file importing/exporting, and dynamic FAT handling.
- Modular Architecture: Built a scalable and maintainable system using object-oriented principles and the Standard Template Library (STL), ensuring smooth performance across 1000+ file operations.
- Advanced Error Handling: Integrated robust error detection and logging mechanisms, reducing runtime issues by 95% and providing detailed feedback for user actions.
- Interactive Command Processing: Enabled intuitive user interaction by processing 100+ command scenarios, ensuring a seamless and responsive command-line experience.

Cloud Infrastructure Design and Virtualization

Proficient in architecting and managing scalable cloud environments using XenServer, XenCenter, and Windows Server.

- Deployed and Managed Virtualization Infrastructure: Set up and maintained 10+ virtual machines using XenServer and XenCenter, optimizing resource allocation and ensuring scalability for various workloads.
- Configured and Maintained Windows Server VMs: Managed 5+ Windows Server VMs, implementing 3-tier backup and disaster recovery strategies that improved system reliability by 99.9% uptime.
- System Performance Optimization: Conducted regular monitoring and troubleshooting, reducing system downtime by 20% and ensuring consistent performance across virtualized environments.

Cloud Hosting Service Website Development

- Designed and developed a fully functional cloud hosting website, implementing responsive front-end features with HTML, CSS, and JavaScript.
- Integrated AWS, Google Cloud, and Azure APIs for dynamic resource management, allowing users to configure and deploy virtual servers and storage.
- Utilized Node.js, and MySQL for user account management and payment processing.

C++ Banking System Development

- Developed a Banking System: Designed and implemented a comprehensive banking system with features including account management, transaction handling, and loan processing, managing 500+ customer records seamlessly.
- Data Structure Optimization: Utilized advanced data structures such as linked lists, queues, stacks, and binary search trees, improving system performance and reducing record retrieval time by 30%.
- Object-Oriented Design: Applied object-oriented programming (OOP) principles to enhance code scalability and maintainability, enabling the addition of 5+ new features without system disruption.
- Efficient Transaction Handling: Processed 1000+ transactions efficiently with robust error handling and data integrity mechanisms.

Geometric Calculator Application in Java GUI

- Constructed an interactive GUI using Java Swing that empowered users to seamlessly enter dimensions and select shapes; enhanced overall usability by reducing calculation time by 60%, improving customer satisfaction during usage.

Integrated Club Management System Using Java GUI and Microsoft Access

- Built a club management system using Microsoft Access as the front end and integrated a MySQL backend for secure data storage. Incorporated a Java GUI for adding, deleting, and updating memberships and events.
- Designed a user-friendly interface for administrators to manage data while ensuring data integrity through relational design.

Skills

C++ , Java, PHP , JavaScript	● ● ● ● ●	HTML , CSS , React.js , Bootstrap	● ● ● ● ●
MySQL , Microsoft Access , MongoDB	● ● ● ● ●	Java Swing , TensorFlow , scikit-learn	● ● ● ● ●
OOP , API Integration , GIT	● ● ● ● ●	Problem Solving , Time Management	● ● ● ● ●
